

Overview

Join us in this effort to share the tools you need for your hospital to implement a standardized approach to stroke care. From the pre-hospital care to rehabilitation, this seminar will provide you with a thorough education on the most current stroke care standards. More importantly, in order for ALL patients to take advantage of the newest stroke interventions, we must join together to provide a network of care where each hospital provides the components of care for which they are equipped. This seminar will support this goal by providing attendees with turn-key program tools such as policies and procedures, order sets, algorithms, staff educational materials and even an onsite consultation/education collaboration (at no charge by request) in order to get these tools implemented in your hospital. You will walk away with CDs of these tools that can be customized to your facility and implemented easily.

Target Audience

EMS personnel, Nursing, Physical Therapy, Occupational Therapy, Social Work, Physicians, Hospital Administrators and all other interested healthcare professionals.

CEU Information

This seminar offers 6.5 contact hours. CEU certification is pending for OT and PT (6.5 hrs.), Social Work and Nursing (7.8 hrs.) Nursing participants must present nursing license and social

Objectives

At the completion of the symposium participants will be able to:

- Review the case for standardizing stroke care in your hospital.
- Identify your hospital's role in a stroke care network.
- Discuss the importance of collaborating with your EMS providers.
- Review the pre-hospital recommended protocols for the state of Kentucky.
- Recognize the key elements of current emergency stroke care and interventional options.
- Identify the key components of inpatient stroke care focused on diagnosis, treatment and prevention.
- Review the importance of rehabilitation in stroke.
- Identify resources of use to stroke patients post-discharge
- Recognize at least two opportunities for promoting your stroke program while improving community awareness of stroke.

security number, attend the entire conference and complete the evaluation form to receive contact hours.

KBN approval of an individual nursing continuing education provider does not constitute endorsement of the program content.(KBN#4-0009-08-013 ; Exp. 12/21/11)

EMS personnel will receive 6.5 continuing education credits.
